

Date: March 1st, 2021

Name of Product: SigmaPlot 14.5 (Includes SigmaStat v 4.0) and SYSTAT 13.x

Contact for more Information: Razi Syed 408 876 4506 smrazi@systat.com

Summary Table

VPAT™ Voluntary Product Accessibility Template®

| Criteria | Supporting Features | Remarks and explanations |
|---|---------------------|---------------------------------|
| Section 1194.21 Software Applications and Operating Systems | See VPAT | |
| Section 1194.22 Web-based Internet Information and Applications | N/A | Not web based |
| Section 1194.23 Telecommunications Products | N/A | Not a telecommunication product |
| Section 1194.24 Video and Multi-media Products | N/A | Not a multimedia product |
| Section 1194.25 Self-Contained, Closed Products | N/A | Not a self contained product |
| Section 1194.26 Desktop and Portable Computers | N/A | Not a computer |
| Section 1194.31 Functional Performance Criteria | See VPAT | |
| Section 1194.41 Information, Documentation and Support | See VPAT | |

Section 1194.21 Software Applications and Operating Systems – Detail

VPAT™

Voluntary Product Accessibility Template®

| <i>Criteria</i> | Supporting Features | Remarks and explanations |
|--|---------------------|--|
| (a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually. | Supports | SigmaPlot/ Systat offers equivalents and follows industry standards to allow access to its functionality via the keyboard. It also has an extensive macro language built in to allow interacting with the software via written code. |
| (b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer. | Supports | SigmaPlot/ Systat does not disable any assistive technologies of either third party products or the operating system. |
| (c) A well-defined on-screen indication of the current focus shall be provided that moves among | Supports | SigmaPlot/ Systat uses standard focus |

| | | |
|---|-----------------|---|
| <p>interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.</p> | | <p>indicators in all aspects of the software including dialogs.</p> |
| <p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.</p> | <p>Supports</p> | <p>SigmaPlot/Systat uses standard focus indicators in all aspects of the software including dialogs.</p> |
| <p>(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.</p> | <p>Supports</p> | <p>SigmaPlot/Systat does not change the meaning of bitmap images used to identify controls or status.</p> |
| <p>(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.</p> | <p>Supports</p> | <p>SigmaPlot/Systat uses standard operating system methods for displaying and editing text.</p> |
| <p>(g) Applications shall not override user selected contrast and color selections and other individual display attributes.</p> | <p>Supports</p> | |
| <p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p> | <p>Supports</p> | |
| <p>(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p> | <p>Supports</p> | <p>SigmaPlot/Systat supports the use of patterns to aid in distinguishing visual elements</p> |

| | | |
|--|----------------|--|
| | | on the graph page. |
| (j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided. | Supports | SigmaPlot/ Systat supports the use of any color on the operating system to aid in distinguishing visual elements. |
| (k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz. | Supports | |
| (l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues. | Not applicable | SigmaPlot/ Systat does not use electronic forms. |

Section 1194.31 Functional Performance

Criteria – Detail

VPAT™

Voluntary Product Accessibility Template®

| <i>Criteria</i> | Supporting Features | Remarks and explanations |
|--|----------------------------|---|
| (a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided. | Supports | SigmaPlot/Systat supports assistive technologies for the visually impaired. |

| | | |
|--|-----------------------|--|
| <p>(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.</p> | <p>Supports</p> | <p>SigmaPlot/Systat supports assistive technologies for the visually impaired.</p> |
| <p>(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided</p> | <p>Not applicable</p> | <p>SigmaPlot does not require hearing in order to use the software.</p> |
| <p>(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.</p> | <p>Not applicable</p> | <p>SigmaPlot/Systat does not require hearing in order to use the software.</p> |
| <p>(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.</p> | <p>Not applicable</p> | <p>SigmaPlot/Systat does not require speaking to use the software.</p> |

| | | |
|--|-----------------|---|
| <p>(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.</p> | <p>Supports</p> | <p>SigmaPlot/Systat offers equivalents and follows industry standards to allow access to its functionality via the keyboard, and is also compatible with standard assistive technologies.</p> |
|--|-----------------|---|
